

PolicySentinel — Prototype Walkthrough

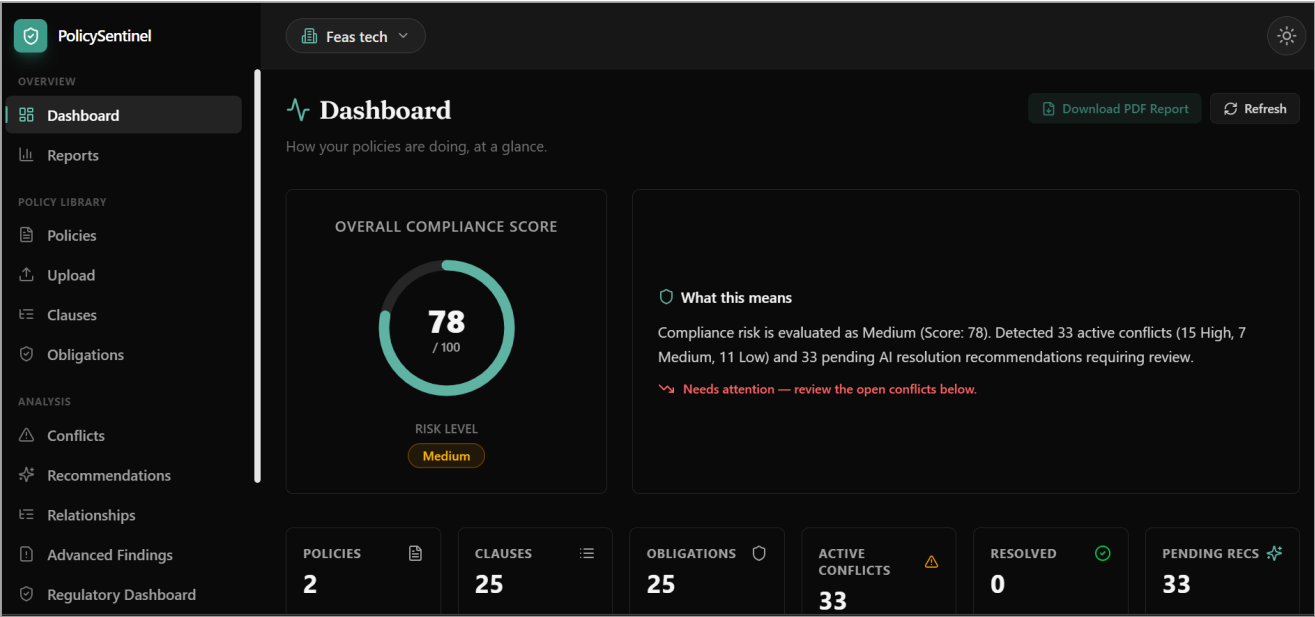

Screen-by-screen record of the working prototype (workspace: "Feas tech")

Captured from the live application. Screens shown in the order a user moves through the tool.

DASHBOARD

Dashboard — overview

Overall compliance score (78/100, Medium risk), a summary line, and counts for policies, clauses, obligations, active conflicts, resolved conflicts, and pending recommendations. "Download PDF Report" button top right.

Dashboard — recent activity

Log of pipeline events (text extraction, clause segmentation, obligation extraction, conflict detection, recommendation generation) with user and timestamp for each entry.

The screenshot shows the "Recent activity" section of the PolicySentinel Dashboard. It displays a log of pipeline events with columns: EVENT, WHO, WHEN, and DETAILS. The events are listed in descending order of time, all occurring 9 minutes ago.

EVENT	WHO	WHEN	DETAILS
Conflict Detection	ceo-b76231e7@feastech.com	9 minutes ago	Successfully completed semantic comparison and conflict detection for policy version 1
Recommendation Generation	ceo-b76231e7@feastech.com	9 minutes ago	Successfully generated 33 AI resolution recommendations and redline drafts
Obligation Extraction	ceo-b76231e7@feastech.com	9 minutes ago	Successfully extracted compliance obligations for policy version 1
Clause Segmentation	ceo-b76231e7@feastech.com	9 minutes ago	Successfully segmented policy text into 7 clauses
Policy Upload	ceo-b76231e7@feastech.com	9 minutes ago	Policy 'policy 2' uploaded by ceo-b76231e7@feastech.com (File: Policy_B_IT_Productivity_and_Convenience_Policy.txt)
Text Extraction	ceo-b76231e7@feastech.com	9 minutes ago	Successfully extracted text from policy document 'Policy_B_IT_Productivity_and_Convenience_Policy.txt'

UPLOAD

Upload — form

File upload (PDF/TXT/MD/DOCX, up to 25MB) with company selector, uploader name, and policy title fields. Right panel lists previously uploaded policies with "View clauses" and "Download" options.

AI ANALYSIS EXPLANATION

A parameter mismatch exists between the obligations due to differing modality (Must vs May). The source obligation specifies a 'Must' mandate while the target specifies a 'May' permission. We recommend reviewing the target obligation to clarify the authority level required.

Side-by-side comparison

Source and target obligations shown next to each other for comparison.

EXISTING OBLIGATION (POLICY 1)

Subject: Employees

Action: enforce multi-factor authentication

Object: network infrastructure and credential access

Modality: Must

NEW OBLIGATION (POLICY 2)

Subject: Employees

Action: enforce multi-factor authentication

Object: network infrastructure and credential access

Modality: May

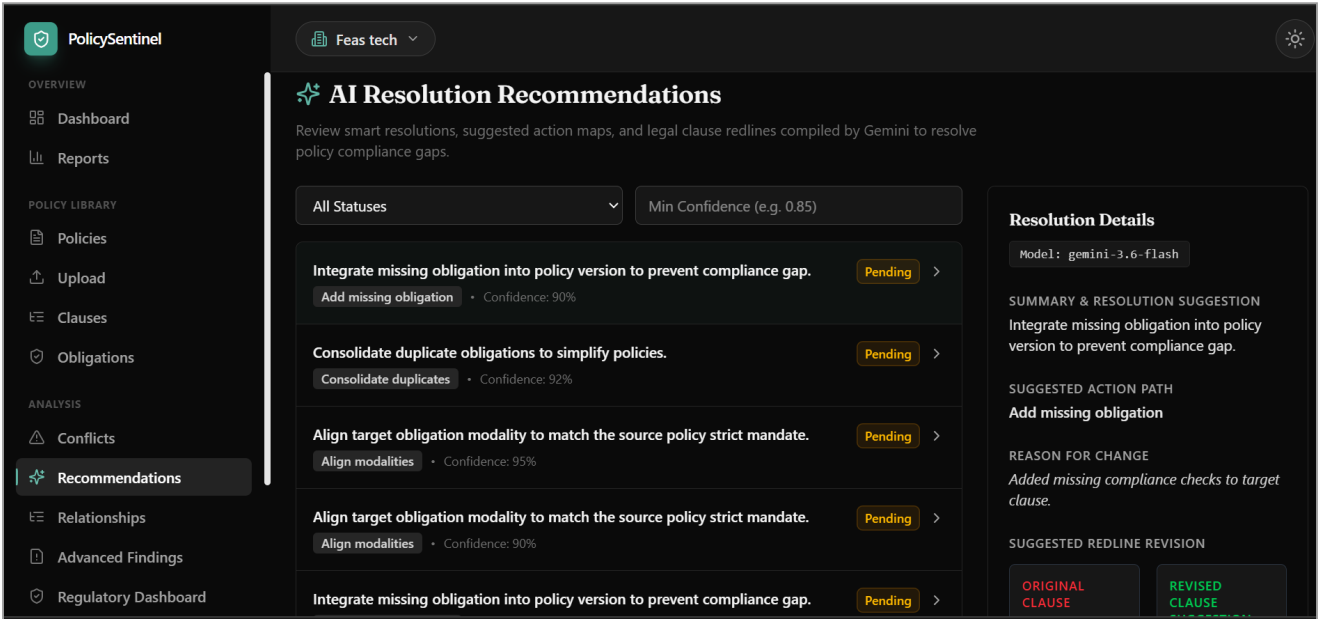

AI RELATIONSHIP EXPLANATION

The obligations enforce the exact same action on the same subject.

RECOMMENDATIONS

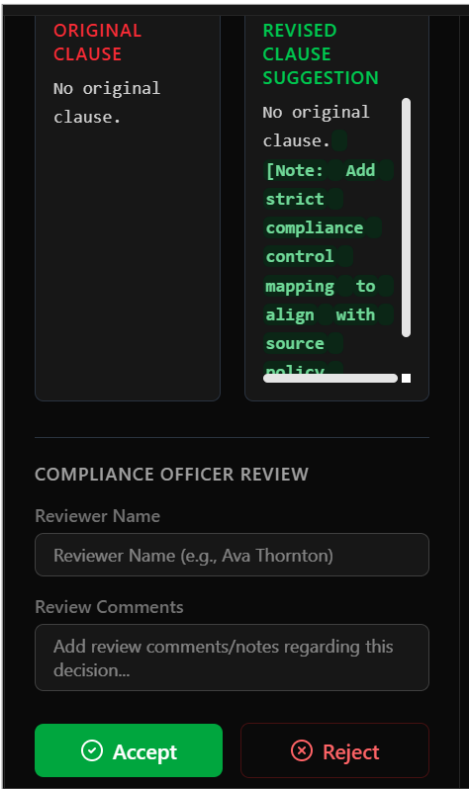

Recommendations — queue

List of suggested resolutions (integrate missing obligation, consolidate duplicates, align modalities) with confidence scores and status.

Recommendations — review and approval

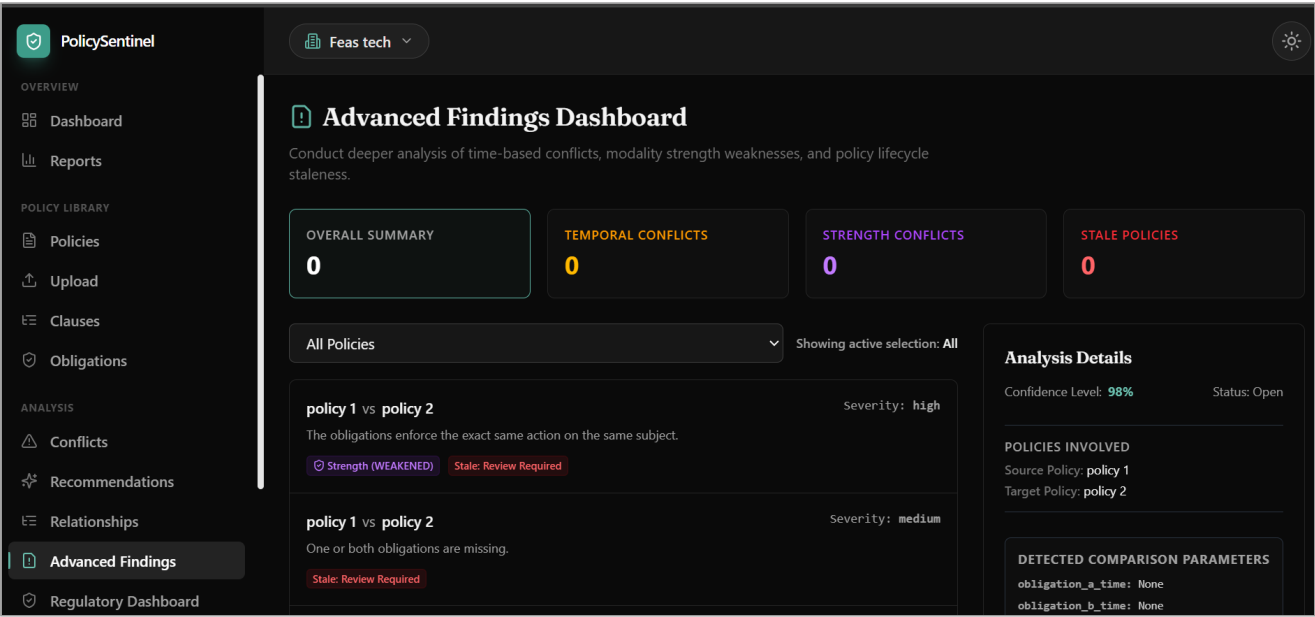

Original vs. revised clause comparison with a reviewer name, comments field, and Accept/Reject buttons.

ADVANCED FINDINGS

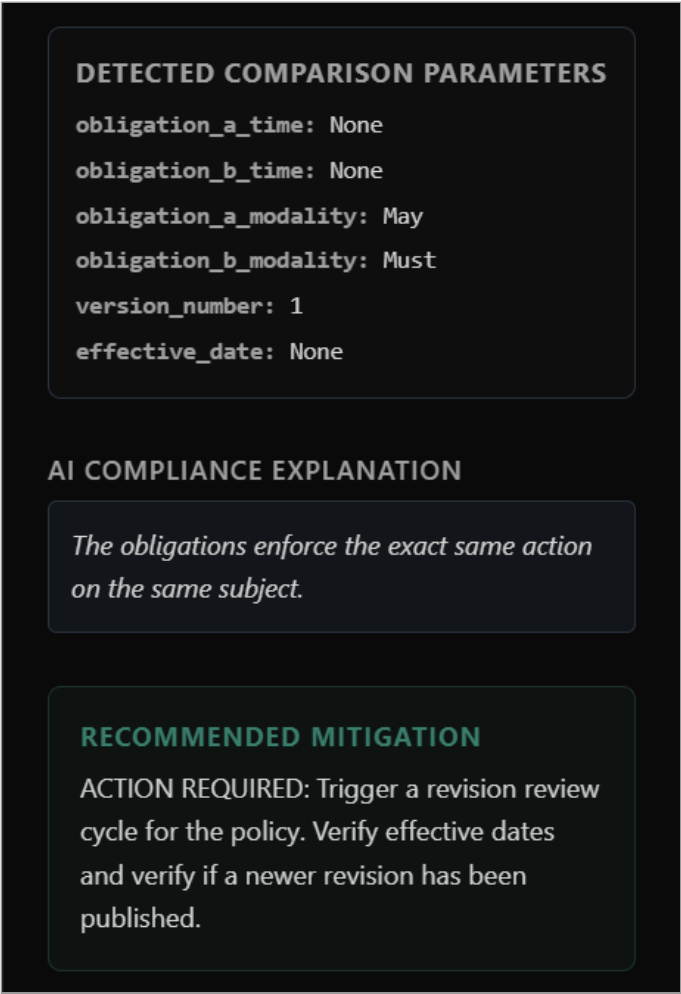

Advanced findings dashboard

Summary counts for temporal conflicts, modality strength issues, and stale policies, with a filterable list of findings by policy.

Advanced findings — detail

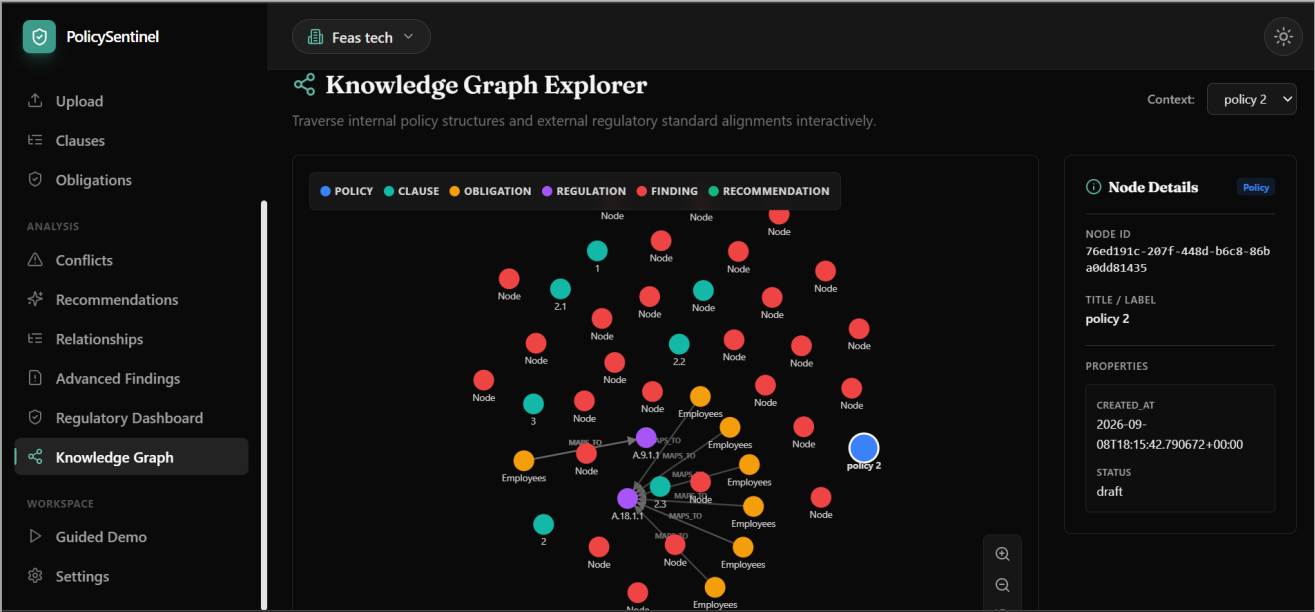

Detected comparison parameters, an explanation, and a suggested mitigation step for a selected finding.

KNOWLEDGE GRAPH

Knowledge graph explorer

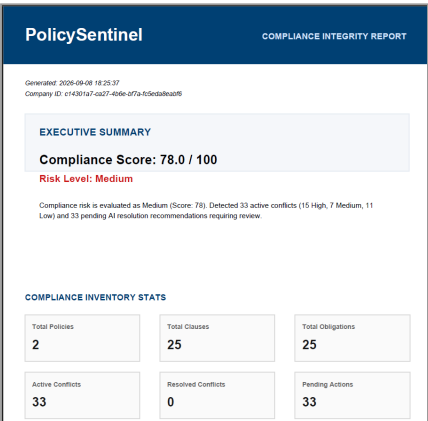

Graph view of policies, clauses, obligations, regulations, findings, and recommendations as connected nodes, with a detail panel for the selected node.

GENERATED PDF REPORT (SAMPLE OUTPUT)

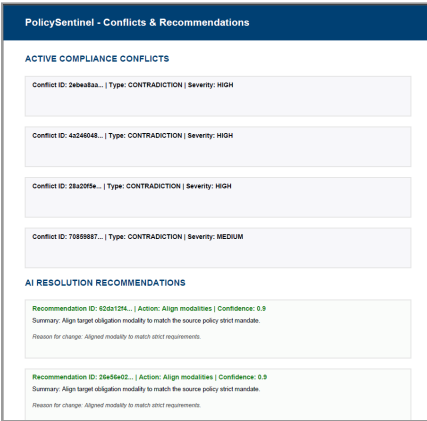

Report — summary page

Compliance score, risk level, and inventory counts.

Report — conflicts and recommendations

Listed conflicts and recommendations with IDs and confidence.

Report — audit trail

Pipeline audit log entries: event type, user, timestamp.
